

DEEPAK SINGH BHADORIYA

Growth & Product Analytics Manager

Gurgaon, India | +91 8269732301 | imdeepakbhadoriya@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Product & growth analytics leader with 4.5 yrs of experimentation, lead-scoring and attribution work at Cars24 and 2.5 yrs grounding in product/operations at Zomato. Drove a 27% CAC reduction, built ML lead-scoring (XGBoost), led A/B experimentation that lifted Lead-to-Test-Booking by 15%, and rebuilt channel attribution that redirected misallocated marketing spend. IIM Lucknow Executive PM (2022). Comfortable owning the funnel end-to-end — KPI definition, hypothesis design, instrumentation, statistical analysis, and stakeholder rollout — across marketplace, food-tech and ops domains.

Core Skills: A/B Testing, SQL, Python, XGBoost, Attribution Modelling, CAC Optimisation, Snowflake, Tableau

PROFESSIONAL EXPERIENCE

Data Analytics Manager | Cars24 Australia — Gurgaon, India Oct 2021 – Present

- Reduced CAC by 27% (110 AUD to 80 AUD) via a marketplace listing-optimization engine across a 3,500-lead acquisition base — improved unit economics and channel ROI.
- Built an XGBoost user-intent scoring model that prioritized high-conversion leads, reducing priority-lead volume by 9% while holding conversion rate — improving overall sales efficiency.
- Designed and ran A/B experimentation for Test Drive Ops on weekend-preferred users, driving a 15% uptick in Lead-to-Test-Booking conversion.
- Built a First-Touch attribution model that exposed a 10% sales misattribution from Product to Marketplace — redirected channel investment toward actual growth drivers and improved lead-source accuracy.
- Deployed an AI chatbot for off-hours inbound lead coverage, driving +2pp uplift in Lead-to-Booking conversion; now being piloted during working hours to reduce dependency on human headcount.
- Identified ~INR 1M impact risk in a CRM restructuring initiative and recommended a rollback strategy, preventing a decline in lead conversion.
- Built a Python + Google Maps API integration that transformed unstructured address inputs into standardized geo fields (PIN, city, state), enabling reliable location-based analytics across 3,500+ leads.
- Built a Google Apps Script QA automation platform integrated with Snowflake and Looker — randomized call audits across 25 agents improved call quality by 20% and compliance adherence.

Product Support → Team Lead | Zomato (Eternal) — Gurgaon, India Jul 2019 – Oct 2021

- Promoted to Team Lead managing 7 agents across Food@Work (B2B cafeteria vertical); assigned each agent ownership of a support vertical (customer, vendor, platform) based on individual strengths.
- Supported product feature rollouts as the front-line UAT/product-support point of contact — validated edge cases, logged and tracked bugs, and flagged release-blocking issues to PMs to keep launches on schedule.
- Launched Food@Work at the Infosys campus during COVID — introduced table reservation for pre-booked, distanced dining as a product-side response to ops constraints.
- Built keyword-matching automation on Freshdesk to auto-tag tickets by customer concern; feedback-only tickets triggered automated customer replies plus a structured feedback email to vendor and cafe manager — eliminating manual triage for routine cases.
- Started as Customer Delight Executive resolving 50–60 tickets/day across order queries and cafe coordination; ~5 min average resolution time.

SKILLS

Experimentation & Growth: A/B Testing, Multivariate Testing, Hypothesis Testing, Funnel & Cohort Analysis, Segmentation, Attribution Modelling, CAC Optimisation, Lifecycle Analysis

Languages & Querying: SQL, Python, BigQuery, Snowflake

BI & Visualisation: Tableau, Power BI, Looker, Google Data Studio

ML / AI: XGBoost, Vertex GenAI, Prompt Engineering, ChatGPT, Perplexity

Data Engineering: ETL Pipelines, Data Warehousing, Snowflake Schema, Automated Reporting

Product & Business: KPI Definition, Stakeholder Management, Experimentation Design, Growth Strategy, UAT, Roadmap Inputs

EDUCATION

Data-Driven Product Management — IIM Lucknow Executive Programme	2022
B.E. Electronics & Instrumentation	2014 – 2018
<i>Prime Minister Scholarship, Government of India</i>
